

Angle Cleaving Unit *NEW*

Angle Cleaving for large diameter fiber

An angle cleaving option is now available for the NYFORS AutoCleaver LDF™. Designed as a rotary clamp, the angle cleaving unit produces accurately angled cleaves of up to 15 degrees on large diameter fibers with a coating diameter from 250 to 1000 µm.

It is possible to mount the Angle Cleaving Unit™ as an add-on to existing cleavers*.

For further information, please see the AutoCleaver LDA™ product data sheet.

* May require software upgrade on cleaver.
